In the revised version of standard, the word “Floor Affixed” was inserted to the front of the previous title.

Editorial and grammatical changes were made in the Foreword, Table of Contents, and List of Standards Committee Members.

Modifications were made to the general structure of the standard in revised version. Editorial and grammatical changes were made throughout the standard.

In sub-section 5.1 Materials, the sentence regarding the usable material, the statement “suitable for production, installation, and service intended”, was removed in the revised version. In third sub-sections 5.1.1 to 5.1.6, the title of the ASTM standard to which it must conform to, was omitted.

Sub-section 6.2, Waste Fittings, all flow passages must now pass a ball of 54 mm (2 1/8 in.) minimum diameter.

Sub-sections 12.0, Installation Instructions and 13.0, Markings, were added to revised version of standard.
